

DiaFlex[®] Single Layer Diaphragms A Blue-White Exclusive

High Performance DiaFlex[®] all PVDF diaphragms are manufactured right in our Blue-White[®] factory to ensure a quality product every time.

DiaFlex[®] features an innovative single layer design and because of it's single layer construction, DiaFlex[®] diaphragms exhibit zero breakdown or delamination. DiaFlex[®] is designed to last for the life of the pump which greatly reduces downtime, maintenance and associated expenses.

The all PVDF composition of both the pump head itself and the diaphragm ensures excellent chemical compatibility. DiaFlex[®] is currently available in four sizes to accommodate varying flow rates.

- ✓ **Zero Breakdown or Delamination**
- ✓ **Single Piece Injection Molded Design**
- ✓ **100% In-house Manufacturing Ensures Quality**
- ✓ **Patent Pending**
