## **THE ALL NEW ProSeries-M<sup>®</sup> MS-6 ULTIMATE CHEMICAL FEED SENSOR**

**MEASURING CHEMICAL FEED  
IS A CRITICAL FACTOR IN WATER AND  
WASTEWATER TREATMENT.**

The all NEW ProSeries-M<sup>®</sup> MS-6 Chemical Feed Sensor accurately measures the chemical feed of metering and dosing pumps by using the latest ultrasonic technology.

- The patent pending design provides the widest flow range on the market, from 10 to 10,000 ml/min (0.158–158.5 GPH). MS-6 also has a low pressure drop of less than 1 PSI.
- Because the MS-6 Chemical Feed Sensor is equipped with wetted components of PVDF and PEEK, it can handle harsh and corrosive chemicals common in the treatment of Water & Wastewater.
- Inline pipe fittings allow for quick and easy Sensor installation.
- The highly affordable and extremely accurate MS-6 Chemical Feed Sensor is unlike anything the Industry has ever seen.
