

Air Bearing Gearless High-Speed Vacuum Turbo Blower

Robust and Reliable Air Foil Bearing

Simple Assembly

No Welding

No Burst

- Improved reliability with patented designs for mass production and simple mechanical assembly
- Sturdy design for frequent start and stop operation
- Longer life spans with contactless, gearless and vibration-free operation
- Operation at zero discharge pressure with improved load capacity and stability
- Bearing module inspection at the component level for high level of quality control
- Saving footprint: replacing four or five side channel blowers with one TNE Turbo vacuum blower
- Saving energy: save more than 70% in energy costs with high efficient TNE Turbo vacuum blowers
